第3問 文学部・法学部・経済学部・商学部・獣医学部・医学部医学科・生活科学部

<作例1>

Chimpanzees or bonobos are highly intelligent, but they simply cannot use language. Human beings have acquired language, which helps them to think or to communicate, have built a culture which is far superior to that of other living things, and have made it possible to spread the culture by symbols, which they use as a means of record.

<作例2>

Not even chimpanzees or bonobos, with such high intelligence, can do anything about language. Language, which is the foundation of our thoughts and can be a means of communication, has enabled humans to build cultures that far surpass those of other creatures, and the recording system of writing has made it possible to pass on culture.

第3問 現代システム科学域・理学部・工学部・農学部・医学部リハビリテーション学科・看護学部

<作例1>

I guess there are a lot of people who think Japanese grammar is difficult. Probably many people have memories of boring Japanese grammar classes at elementary and junior high school. Some students may have been forced to memorize a conjugation table they didn't understand and read it aloud all together.

<作例2>

Probably many people think that Japanese grammar is difficult. Many people might remember the Japanese grammar classes in elementary and junior high schools as being unbearably boring, too. Some might have been forced to memorize mysterious conjugation tables and then to recite them aloud in unison.
